COSCO *offers all these fine features!*

Seats are all-steel, saddle-shaped, and luxuriously cushioned with foam rubber. Upholstery is glove-tight, and there are no staples or tacks to pull loose.

All-steel, cushioned backrests are curved two ways to fit the natural contours of the back. On "Director" chairs, backrests are upholstered front and back.

Bonderized, baked-on enamel finish is astonishingly resistant to chipping and scratching, sure to stay new-looking for years. Choice of smart, decorator colors.

Swivel chair shafts are of one-inch solid carbon steel. Seats revolve on two lifetime-lubricated bushings. "Director" Series chairs tilt on nylon bearings.

Seamless, one-piece, die-drawn bases are of heavy-gauge steel, packed with sound-absorbing material, have stainless steel scuff plates, protective shoe guards.

Two-inch, soft rubber casters rotate on lifetime-lubricated roller bearings, swivel on double rows of ball bearings. Casters lock in place, remove easily.

To protect floors and carpets, all models without casters have rubber-cushioned steel glides, except 21 Series and 60-Y, which have steel cap glides.

To prevent backrests from marring walls, chairs without casters have legs extended in rear. Sloped seats cause body to gravitate slightly toward backrest.

Choose from six smart enamel colors and a wide range of upholstery fabrics and patterns. Complete swatch cards are available for your selection.

Quick Reference Tab

This is the first of four specially tabbed index sheets preceding each of the following sections: Addresses of Manufacturers, Product Index, Trade Names, and Reference Section. By following carefully the procedures indicated by the sketches and copy below the die-cut index tabs will be visible when the directory is closed and will facilitate finding the section to be consulted.

Push tab *down* as shown and fold to right so that tab extends beyond edge of sheet. Interlock carefully, one edge at a time with slits cut in the edge of the sheet.

When properly positioned the index tab will appear as illustrated and be ready for quick reference service. Should some mischance damage the edge slits (very unlikely if care is used) simply paste the tab in position.

How to use the . . .

OA Buyers Index

The purpose of each issue of the OA Buyers Index is to provide accurate information concerning products and producers in the shortest possible time and with a minimum of effort. To facilitate finding, each of the four sections of the Index — Addresses of Manufacturers, Product Index, Trade Names, Reference Section — is preceded by a Quick Reference Tab index sheet. By following the simple instructions below (and on each of the Quick Reference Tab index sheets) the user of the Index should be able to locate types of products and names and addresses of manufacturers easily.

Product Index

To find manufacturers or suppliers of a specific product look for the product under its alphabetical listing in the Product Index beginning on page 51. Items are listed under the names most commonly used. In addition there are many cross references to the main headings under other names of products in common usage and demand. Obviously, it is impossible to list every name that anyone might use. If you do not find an item under the first name or heading you think of, look for it under another commonly used name.
When the name or names of manufacturers have been found, look in the Addresses of Manufacturers Section, beginning on page 19, for addresses.

Trade Names

When a trade name is known and the manufacturer's name and address is sought, look in the list of Trade Names beginning on page 329. There the manufacturer's name is given following each trade name or mark listing. To obtain the manufacturer's or supplier's address, look in the Addresses of Manufacturers Section, beginning on page 19.

Addresses of Manufacturers

To find the address of a manufacturer whose name is already known, turn to the Addresses of Manufacturers Section, beginning on page 19.

Reference Section

In this section, beginning on page 367 are tables, charts and merchandising suggestions conveniently available for reference, plus listings of national conventions and active trade associations in the United States.

An Invitation

Because the office equipment and supply industry is in a constant state of development, no directory can be absolutely up-to-date nor perfect in breakdown of product classifications. Suggestions for extension and improvement are always welcome. You are invited to write.

SPECIALISTS IN SEATING

AND SEATING ONLY

FOR OVER 30 YEARS

Harter specialists have been designing, building and fitting fine seating since 1927. This experience, combined with only the finest materials — and more of them — assure you and your clients of the most desirable seating made today. But "specialists" and "experience" are only words. Let's see what they mean to you.

In styling

Harter seating, led by the new Criterion, and recently introduced Tempo gives you the contemporary styling your clients prefer. The cantilever arm is unique in the Criterion line but typical of the advanced features that you'll find in the entire Harter line.

In quality

Harter seating has always had a "quality" reputation. The reason is simple. More thought is given to what goes into Harter seating and how it is crafted. Take the use of foam rubber. Harter uses all foam rubber where others use a thin piece of foam rubber over a flat spring. Another example: Harter upholstery. The Tempo series has hardwood arms. Harter craftsmen cover them with generous molded sections of foam rubber. Then they affix heavy pieces of felt to the sides. The result — a superb example of fine furniture with the feel of luxury — Harter luxury.

Harter quality isn't always tangible. Sturdy quietness is a composite of many features. One is Harter's original one-piece base: strongest made. Quiet working steel parts have no peer.

In comfort

When you have Harter seating you have the one brand that does not confuse comfort with "softness". Each part of the chair's anatomy truly relates to human anatomy for all-day freshness.

Harter controls bring you closer to perfect comfort, too. The seating adjusts to you — you don't have to adjust to the seating.

When you're concerned with furniture from the budget-class to the finest — and seating in particular — speak to a Harter "seating specialist". He will be glad to acquaint you with all the details. Just a wire — or a 'phone call — and a Harter "specialist" will be at your service. He'll consider the visit a privilege.

NOTE: Harter seating is available in a vast variety of colors and upholsteries. Naugahyde and Hygen Telex in plastics; Gros Point, Striata and Mansfield in fabrics; and luxurious leathers. All can be used in almost unlimited color combinations. Durable baked-on enamels in matching colors will also meet the varied preferences of your clients.

As your employees learn more about your business and the office supply and equipment industry as a whole, they become more valuable to your organization. You can speed up this self-improvement process dramatically by exposing them to OFFICE APPLIANCES every month.

The best method is to give each key staff member an inexpensive OA group subscription, which includes the annual OA BUYERS INDEX at no additional cost. Over 200 dealers have taken advantage of OA's special group rate of only $1.50 per year per subscription, when five or more subscriptions are entered.

It's sound business practice to keep your employees well-informed on industry developments. Take advantage of this low-cost way of doing it today. Just send us a list of your employees (five or more) and we'll enter their subscriptions at once.

Offered in a combination of top grain leather or Elastic Naugahyde with Gros Point or other selected fabrics over foam rubber. Available with interchangeable cane or upholstered backs.

If office chairs aren't comfortable, folks won't buy them. That's axiomatic. And if your profit's too low, *you* won't sell them. That's *automatic*!

For deep-down seating comfort—*and* good dealer profits—Boling's the chair line to push. Write for details and new catalog—on your letterhead, please.

memo to the boss:

As your employees learn more about your business and the office supply and equipment industry as a whole, they become more valuable to your organization. You can speed up this self-improvement process dramatically by exposing them to OFFICE APPLIANCES every month.

The best method is to give each key staff member an inexpensive OA group subscription, which includes the annual OA BUYERS INDEX at no additional cost. Over 200 dealers have taken advantage of OA's special group rate of only $1.50 per year per subscription, when five or more subscriptions are entered.

It's sound business practice to keep your employees well-informed on industry developments. Take advantage of this low-cost way of doing it today. Just send us a list of your employees (five or more) and we'll enter their subscriptions at once.

New PRICES, New DISCOUNTS, New PROFITS

Take a look at our new price list, revised in September. You'll find that many of the old staple items have been reduced. And the dealer discount schedule has been greatly simplified by the use of a standardized discount. Result: in most cases, there are higher margins for you!

Yet the fine quality of New York Silicate products has not changed a bit. Its obviously superior material and workmanship will still be evident to your customers... you'll get no profit-killing complaints nor returns. For a higher net, make your next order out to New York Silicate Book Slate Company.

For years a leader in the printing of business forms, Miami maintains a high standard of quality and accurate workmanship in every form it produces by controlling all mechanics of production in its completely modern integrated plant.

Miami has its own type foundry and plate making department; sets its own type composition; operates its own bindery; prints letterpress from rubber plates. This kind of control gives you the finest forms possible in the shortest time—at a reasonable price.

Write for Miami's Manual. It fully describes all registers; shows typical forms, available type faces; carbon rolls, binders—everything you need to conveniently order Miami

OFFICE FENCE

BY JERIT

The most modern, most efficient way of partitioning large office and store areas into smaller, more attractive and practical work areas.

Custom design your own semi-private offices and work areas for more efficient use of existing space — at a fraction of the cost of conventional office dividers. The easy, do-it-yourself installation effects additional time and labor savings...and Jerit "Office Fences" may be changed or re-arranged at any time to keep up with changing needs.

Jerit Office Fences consist of basic rolled steel uprights with a selection of pressed wood, laminated fiberglass or metal decorative screen panels forming the new structural wall. They are available in standard heights and panel widths. Both floor mounting or floor to ceiling installations are available.

KARLO POSTURE TYPEWRITER SUPPORT

money saving equipment

Girls aren't all built alike. You cannot expect a tall girl hunched over the typewriter to be efficient. Nor can you expect a 5-foot-2 girl to earn her salary "stretching" to the keyboard.

THE KARLO TYPEWRITER POSTURE SUPPORT is adjustable to the height of any operator. The solid construction makes it rigid preventing vibration and overturning.

OTHER KARLO MODELS ▶

MODEL NO. 1 — Metal with wood top — adjustable from 26 to 38 inches.

Trade Names

In this section are listed nearly 8000 trade or brand names of office furniture, machines and supply items, each followed by the name of the manufacturer or national distributor. For addresses see section beginning on page 19.

Quick Reference Tab

This is the third of four specially tabbed index sheets preceding each of the following sections: Addresses of Manufacturers, Product Index, Trade Names, and Reference Section. By following carefully the procedures indicated by the sketches and copy below the die-cut index tabs will be visible when the directory is closed and will facilitate finding the section to be consulted.

Push tab *down* as shown and fold to right so that tab extends beyond edge of sheet. Interlock carefully, one edge at a time with slits cut in the edge of the sheet.

When properly positioned the index tab will appear as illustrated and be ready for quick reference service. Should some mischance damage the edge slits (very unlikely if care is used) simply paste the tab in position.

Through the reports issued by the Audit Bureau of Circulations, this publication, along with other publisher members of ABC, voluntarily and regularly give the buyers of advertising more verified factual information than is available for any other advertising media at any time.

Meet Mr. ABC — he works for you

This man is a circulation auditor. His job? Keeping us on our publishing toes.

As a representative of the Audit Bureau of Circulations, this specially trained auditor visits our office annually to make an exacting inspection of our circulation records. He has access to all of our books and records in obtaining the FACTS about our circulation.

His independent analyses, published by ABC in an Audit Report, provide us with an accurate measure of your interest in this publication. To keep you as a reader year after year, we must provide a publication worth your money issue after issue.

The degree with which we hold your interest, as verified in the ABC report, is measured by the number of copies sold each issue, where they are sold, and how they are sold. Obviously, if you aren't interested you aren't going to buy.

This same information is of interest to our advertisers, too. The rate they pay for the advertising space they use is based on our paid circulation.

Thus, the ABC report is a guide for us in providing you with a publication which merits your support and a guide to our advertisers that they get what they pay for—your interest as readers.

Reference Section

In this section are tables, charts and merchandising suggestions conveniently available for reference, plus listings of national conventions and active trade associations in the United States.

Quick Reference Tab

This is the fourth of four specially tabbed index sheets preceding each of the following sections: Addresses of Manufacturers, Product Index, Trade Names, and Reference Section. By following carefully the procedures indicated by the sketches and copy below the die-cut index tabs will be visible when the directory is closed and will facilitate finding the section to be consulted.

Push tab *down* as shown and fold to right so that tab extends beyond edge of sheet. Interlock carefully, one edge at a time with slits cut in the edge of the sheet.

When properly positioned the index tab will appear as illustrated and be ready for quick reference service. Should some mischance damage the edge slits (very unlikely if care is used) simply paste the tab in position.

Table of Profit and Markups

• Establishing the correct retail prices of office supply and equipment items is not easy. Many of the factors involved, such as competition and overhead costs, are available only from the dealer's own knowledge and records. After the gross profit percentage figures have been determined there comes the tedious arithmetical process of applying the percentages to cost prices. The accompanying table provides an easy way of arriving at selling prices. A helpful feature is that the column headings show the profit per cent on the selling price while the column footings show the profit per cent on the cost price.

CASH DISCOUNT TABLE

• Probably every dealer uses or tries to make use of the cash discount offered by most manufacturers and wholesalers for prompt payment invoices for merchandise. More than likely, consideration has not been given to the significance of the cash discount when viewed as a year 'round factor. The table at the lower right is revealing. It is an old adage among financial men that you actually save money if you borrow capital to discount bills. It is wise to think carefully before passing up cash discounts.

The cash discount is what a seller is willing to give his customer for paying his bill a certain number of days prior to the expiration of a certain period of time. The most common cash discount is 2% 10 days — net 30 days. By paying bills 20 days before expiration of the net payment period is given a 36% advantage, because in a year there are 18 periods of 20 days each, which might be anticipated by the buyer if he were having shipments made to him constantly through the year. The table below shows the cash discounts in current use and the advantages accruing to buyers through prompt payments.

½% 10 days—net 30 days= 9% per annum
1 % 10 days—net 30 days=18% per annum
1½% 10 days—net 30 days=27% per annum
2 % 30 days—net 4 mos.= 8% per annum
2 % 10 days—net 60 days=14% per annum
2 % 30 days—net 60 days=24% per annum
2 % 10 days—net 30 days=36% per annum
3 % 10 days—net 4 mos.=10% per annum
3 % 30 days—net 60 days=36% per annum
3 % 10 days—net 30 days=54% per annum

Business Gifts for Business People

The volume done in business gift selling is in direct proportion to (1) advertising; (2) special promotions and (3) emphasis by salesmen.

This is in essence the conclusion reached by OFFICE APPLIANCES' editors through talks with dealers, a mail survey and special interviews with office supply and equipment store managers.

Many dealers state frankly that they have not put special stress on selling business gifts for either business people or others, either at Christmas time or any other season of the year. Others freely admit that their returns have been in direct proportion to poor planning and failure to promote these gifts.

On the other hand those who have been successful in gift merchandising of items out of their regular stock are enthusiastic over the volume and the potential possible as they expand their selling efforts.

Following is a list of stock items that dealers have found appropriate for sale as Business Gifts:

THE EFFECTS OF PRICE CUTTING

On a basis of 30% Gross Profit a cut of

5% requires 14% more $ volume and handling 20% more merchandise.

8% requires 25% more $ volume and handling 36½% more merchandise.

10% requires 35% more $ volume and handling 50% more merchandise.

12% requires 50% more $ volume and handling 73¾% more merchandise.

15% requires 70% more $ volume and handling 100% more merchandise.

20% requires 140 % more $ volume and handling 200% more merchandise.

In brief, if you cut 15% on a $100.00 sale, it is necessary to sell $170.00 in value and you must handle twice as much merchandise before you can make a profit of $30.00 to which the original $100.00 sale entitles you.

Dealer Guide to Copy Making Processes

PROCESS	COST PER COPY (Estimated)	COPY SPEED	USES—ADVANTAGES	PRICE RANGE
PHOTOCOPY Diffusion or silver-transfer process.	From 10c to 3c per copy—includes multiple copies.	One to three per minute—now possible to use same master.	Makes an excellent black and white (or colored stock) reproduction on a variety of positive papers in less than a minute, copying most colors, inks, etc. Economically best suited for making less than 10 copies of one page of material, but equipment now available for making extra copies using the same master (negative). Copies are permanent and usually legally acceptable. Chemicals are used and copies are damp-dry, but operation of machine is simple.	$80 to $800
PHOTOCOPY Dye-transfer process. *(Verifax)*	Less than 10c for a single copy—multiples at 2½c each.	One to three per minute—using same matrix.	This process is similar to photocopy in most respects, but in place of a negative a gelatin-coated "matrix" is used which makes it possible to obtain more than one copy—up to as many as six with decreasing intensity. One advantage is ability to reproduce on bond or regular sulphite paper as well as on film and other papers. Also produces damp-dry copies, and chemicals are used.	$99.50 to $395
HEAT CONTACT Infrared process. *(Thermofax)*	Under 6c per copy on buff paper.	Possible to get one copy in four seconds.	Fastest of the machines, this direct copy process utilizing infrared rays will reproduce any metallic or carbon-based inks almost instantly. No chemicals are needed, but special paper is necessary. Also best suited for making less than 10 copies of a single page. Used extensively for quick copies (printing in four seconds) and in many systems including customer billing. Unable to reproduce certain inks and colors (ball point). Copy paper is thin and translucent and is sensitive to heat and light, cutting down its permanency. Operator control is vital factor in delivering clear, readable copies.	$299 to $429
DIAZO Whiteprinting process.	Under 2c per copy in multiple runs.	Three or more per minute possible.	This machine is well-suited for multiple copy and systems work in runs up to 1,800 per hour, depending upon the size of the unit. It has the ability to reproduce copies in a variety of printed colors on various stock colors. Chemicals are used (ammonia in some), but are dry for all practical purposes when delivered. Not as practical as other machines for making one or two copies for general office use since it will copy only from one-sided, translucent sheets unless special film is used to make a master. It will not copy blue or purple. Used with photocopy or xerography units to form office systems.	$400 up to $7500
XEROGRAPHY Electrostatic process.	Single copy 6c—as little as 2c each for multiples.	One copy in three minutes.	An electrostatic process which can produce paper copies on various stock colors and weights and even metal offset plates. Used primarily for making offset masters, spirit masters, and translucent copies for use in diazo machines. Can both reduce and enlarge an original when making a copy, and reproduction quality is excellent. Because of expense and size, not generally considered for use as an office copying machine for making one or two quick copies.	$1700 up depending upon components used.

Opportunities in Business Automation

Acceptance of business automation is indicated by the fact that today more people are involved in data processing in offices than are employed in all manufacturing in the United States. This is in spite of the increased amount of production per employee as a result of using automated equipment. And the industry providing the automated equipment has developed from virtually nothing 10 or 12 years ago to an estimated one billion dollars in 1960. Harbridge House reports the volume in automation supplies in 1958 was $210,000,000. If the rate of progress revealed in 1959 holds true, the 1960 supplies volume should be close to a half billion dollars.

What does a dealer need to do to capitalize profitably on this new and rapidly expanding market for automation accessories and supplies? The first step is to educate himself and his salesmen. There are many educational institutions, training organizations and manufacturers who offer courses of instruction in various phases of the subject. Additionally, there are business shows, books, and a very fine opportunity resident in becoming an associate member of the National Machine Accountants Association.

A significant procedure would be to become familiar with what accessories and supplies are available to dealers. Such a list appears (right). This knowledge can be usefully extended by working closely with sales representatives of manufacturers.

HEYER MASTER UNITS

Heyer Master Units are better because they're dated to assure you of freshness. Over-age units often become hard and brittle, resulting in poor, spotty copy. Heyer Units are packaged in standard boxes of 100 or convenient 25 unit envelopes so that you may order as needed and be sure of fresh, top-quality units at all times.

A GRADE AND COLOR TO SUIT EVERY NEED

All Heyer Master Units are edge-sealed for cleanliness in handling. O-SO-KLEEN Units are super-coated to give most complete protection against staining of hands. Purple is the strongest color and will produce 400 or more copies under proper working conditions; Red, Green and Blue somewhat less. Black will produce 100 to 125 copies. *Economy* grade (purple only) saves money where runs of only 150 to 200 copies are required. Order by number, grade, size and color.
